Please read these instructions before operating your set
and retain them for future reference.

English

TQB0E0411U-1

Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site   http://panasonic.net

Table of Contents

Important Safety Notice

WARNING

1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
   Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
   No naked flame sources, such as lighted candles, should be placed on / above the set.

2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
   Do not defeat the purpose of the earthing plug.

4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION

This appliance is intended for use in environments which are relatively free of electromagnetic fields.
Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.
To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

Trademark Credits
- VGA is a trademark of International Business Machines Corporation.
- Macintosh is a registered trademark of Apple Computer, USA.
- S-VGA is a registered trademark of the video Electronics Standard Association.
  Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.

Note:
Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display.
Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

Safety Precautions

WARNING

■ Setup

<u>This Plasma Display is for use only with the following optional accessories.</u> **Use with any other type of optional accessories may cause instability which could result in the possibility of injury.**

(All of the following accessories are manufactured by Matsushita Electric Industrial Co., Ltd.)

- Speakers TY-SP42P8W-K (TH-42PS10EK, TH-42PH10EK),
  TY-SP42P8W-S (TH-42PS10ES, TH-42PH10ES),
  TY-SP50P8W-K (TH-50PH10EK),
  TY-SP50P8W-S (TH-50PH10ES),
  TY-SP58P10WK (TH-58PH10EK)
- Pedestal TY-ST07-K (TH-42PS10EK, TH-42PH10EK, TH-50PH10EK),
  TY-ST07-S (TH-42PS10ES, TH-42PH10ES, TH-50PH10ES),
  TY-ST08-K (TH-42PS10EK, TH-42PH10EK, TH-50PH10EK),
  TY-ST08-S (TH-42PS10ES, TH-42PH10ES, TH-50PH10ES),
  TY-ST58-K (TH-58PH10EK)
- Mobile stand TY-ST42PF3 (TH-42PS10EK/S, TH-42PH10EK/S, TH-50PH10EK/S),
  TY-ST58PF10
- Wall-hanging bracket (vertical) TY-WK42PV7
- Wall-hanging bracket (angled) TY-WK42PR7
- Wall-hanging bracket (drawer type) TY-WK42DR1 (TH-42PS10EK/S, TH-42PH10EK/S, TH-50PH10EK/S)
- Ceiling-hanging bracket TY-CE42PS7 (TH-42PS10EK/S, TH-42PH10EK/S, TH-50PH10EK/S)
- BNC Component Video Terminal Board TY-42TM6A
- BNC Composite Video Terminal Board TY-42TM6B
- BNC Dual Video Terminal Board TY-FB9BD
- SCART Terminal Board TY-FB8SC
- RCA Component Video Terminal Board TY-42TM6Z
- RCA Composite Video Terminal Board TY-42TM6V

- HD-SDI Terminal Board................................ TY-FB9HD
- HDMI Terminal Board TY-FB8HM
- Ir Through Terminal Board TY-FB9RT
- U/V Tuner Board with Hospitality Port TY-FB9TE (TH-50PH10EK/S, TH-58PH10EK)
- Set Up Loader TY-RM09SL (TH-50PH10EK/S, TH-58PH10EK)
- Wireless Presentation Board....................... TY-FB10WPE (TH-42PH10EK/S, TH-50PH10EK/S, TH-58PH10EK)
- AV Terminal Box TY-TB10AV
- Touch Panel TY-TP42P8-S (TH-42PS10EK/S, TH-42PH10EK/S),
  TY-TP50P8-S (TH-50PH10EK/S), TY-TP50P10S (TH-50PH10EK/S),
  TY-TP42P10S (TH-42PS10EK/S, TH-42PH10EK/S),
  TY-TP58P10S (TH-58PH10EK)
- Anti glare filter TY-AR50P9W (TH-50PH10EK/S),
  TY-AR42P9W (TH-42PS10EK/S, TH-42PH10EK/S),
  TY-AR58P10W (TH-58PH10EK)

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Plasma Display on sloped or unstable surfaces.
- The Plasma Display may fall off or tip over.

Do not place any objects on top of the Plasma Display.
- If water is spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult your local Panasonic dealer.

Transport only in upright position!
- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation;
If using the pedestal (optional accessory) for the Plasma Display, leave a space of at least 10 cm at the top, left and right, at least 6 cm at the bottom, and at least 7 cm at the rear. If using some other setting-up method, leave a space of at least 10 cm at the top, bottom, left and right, and at least 7 cm at the rear.

■ When using the Plasma Display

The Plasma Display is designed to operate on 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.
  • Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

Do not stick any foreign objects into the Plasma Display.
  • Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Plasma Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.
  • High voltages which can cause severe electric shocks are present inside the Plasma Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.

Do not use any power supply cord other than that provided with this unit.
  • Doing so may cause fire or electric shocks.

Securely insert the power supply plug as far as it will go.
  • If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.
  • Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.
  • Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

If the Plasma Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

■ If problems occur during use

If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odour starts to come out from the Plasma Display, immediately unplug the power supply plug from the wall outlet.
  • If you continue to use the Plasma Display in this condition, fire or electric shock could result. After checking that the smoke has stopped, contact your local Panasonic dealer so that the necessary repairs can be made. Repairing the Plasma Display yourself is extremely dangerous, and shall never be done.

If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damages, disconnect the power supply plug immediately.
  • A short circuit may occur, which could cause fire. Contact your local Panasonic dealer for any repairs that need to be made.

Safety Precautions

⚠ CAUTION

■ When using the Plasma Display

Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.
- Heated air comes out from the ventilation holes at the top of Plasma Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

Be sure to disconnect all cables before moving the Plasma Display.
- If the Plasma Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.
- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.
- If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

Remote Control Transmitter
EUR7636090R

Batteries for the Remote
Control Transmitter
(2 × R6 (UM3) Size)
Power supply cord

Fixing bands × 2

Remote Control Batteries
Requires two R6 batteries.

1. Pull and hold the hook, then open the battery cover.

2. Insert batteries - note correct polarity (+ and -).

"R6 (UM3)" size

3. Replace the cover.

Helpful Hint:
For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

⚠ Precaution on battery use

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter.
Disposal of batteries should be in an environment-friendly manner.
Observe the following precaution:
1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Plasma Display set.

Connections

When connecting the speakers, be sure to use only the optional accessory speakers.
Refer to the speaker's Installation Manual for details on speaker installation.
(Example: TH-42PH10EK)
Speakers (Optional accessories)

SPEAKERS
Terminals (R)

AC cord connection
(see page 12)

SPEAKERS
Terminals (L)
– AC cord fixing
Plug the AC cord into the display unit.
Plug the AC cord until it clicks.

Note:
Make sure that the AC cord is locked
on both the left and right sides.

Unplug the AC cord

Unplug the AC cord
pressing the two
knobs.

Note:
When disconnecting the AC cord, be
absolutely sure to disconnect the AC
cord plug at the socket outlet first.

– Cable fixing bands Secure any excess cables with bands as required.

Pass the attached cable fixing band through the clip as shown in the figure.
To secure cables connected to Terminals, wrap the cable fixing band around them then pass the pointed end through the locking block, as shown in the figure.
While ensuring there is sufficient slack in cables to minimize stress (especially in the power cord), firmly bind all cables with the supplied fixing band.

Conversion adapter
(if necessary)

Mini D-sub 15p

RGB

PC cable

AUDIO

PC IN

Audio

Stereo plug

Connect a cable which matches
the audio output terminal on the computer.

Notes:
- Due to space limitations, occasionally you may have trouble connecting Mini D-sub 15P cable with ferrite core to PC input Terminal.
- Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
- The display resolution is a maximum of 640 × 480 dots (TH-42PS10EK/S), 768 × 768 dots (TH-42PH10EK/S), 1,024 × 768 dots (TH-50PH10EK/S, TH-58PH10EK) when the aspect mode is set to "4:3", and 852 × 480 dots (TH-42PS10EK/S), 1,024 × 768 dots (TH-42PH10EK/S), 1,366 × 768 dots (TH-50PH10EK/S, TH-58PH10EK) when the aspect mode is set to "16:9". If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
- The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
- Some PC models cannot be connected to the set.
- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
- The computer shown in the illustration is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.
- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
- Change the "Component/RGB-in select" setting in the "Setup" menu to "Component" (when Component connection) or "RGB" (when RGB signal connection). (see page 38)
- To use sync input VBS signals, use the connector which incorporates a 75-ohm termination resistance and which is available on the market, for the connection of the HD connector where the VBS signals are to be input.

Signal Names for Mini D-sub 15P Connector
Pin Layout for PC Input
Terminal

Pin No.	Signal Name	Pin No.	Signal Name	Pin No.	Signal Name

Notes:
• Use the RS-232C cable to connect the computer to the Plasma Display.
• The computer shown is for example purposes only.
• Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal.
The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

Communication parameters

Signal level	RS-232C compliant
Synchronization method	Asynchronous
Baud rate	9600 bps
Parity	None

Basic format for control data
The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

| STX | C1 C2 C3 | : | P1 P2 P3 P4 P5 | ETX |

Start (02h)
3-character command (3 bytes)
Colon
Parameter(s) (1 - 5 bytes)
End (03h)
Notes:
• If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
• If an incorrect command is sent by mistake, this unit will send an "ER401" command back to the computer.
• SL1A, SL1B, SL2A and SL2B of Command IMS are available only when a dual input terminal board is attached.
Command

Command	Parameter	Control details
PON	None	Power ON
POF	None	Power OFF
AVL	**	Volume 00 - 63
AMT	0	Audio MUTE OFF
	1	Audio MUTE ON

OFF
Press the OFF button on the remote control to turn the Plasma Display off.

> Power Indicator: Red (standby)

ON

Press the ON button on the remote control to turn the Plasma Display on.

> Power Indicator: Green

Turn the power to the Plasma Display off by pressing the ⏻/I switch on the unit, when the Plasma Display is on or in standby mode.

Note:
During operation of the power management function, the power indicator turns orange in the power off state.
Initial selections

Selecting the input signal

Select the input signals to be connected by installing the optional Terminal Boards.

INPUT

Press to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

Input signals will change as follow:

• TH-42PS10EK/S

→ INPUT1 → INPUT2 → INPUT3 → PC

• TH-42PH10EK/S, TH-50PH10EK/S, TH-58PH10EK

→ INPUT1A → INPUT1B → INPUT2 → INPUT3 → PC

SLOT1 is for dual input so that you can select INPUT1A or INPUT1B for INPUT1.
INPUT1A : VIDEO signal terminal in SLOT1
INPUT1B : S-VIDEO signal terminal in SLOT1

Notes:
• Selecting is also possible by pressing the INPUT button on the unit.
• Input terminal will not be selected if the terminal board is not installed into the SLOT.
• Select to match the signals from the source connected to the component/RGB input terminals. (see page 38)
• In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.

ASPECT Controls

The Plasma Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

ASPECT

Press repeatedly to move through the aspect options:

4 : 3 → Zoom → 16 : 9 →
Panasonic Auto ← Just ←

Note:
When selecting an input slot that attaches BNC Dual Video Terminal Board (TY-FB9BD), Panasonic Auto cannot be selected.

[from the unit]

INPUT   MENU   −/▼ VOL ▲ +/▲   ENTER/■

The aspect mode changes each time the ENTER button is pressed.

[During MULTI PIP Operations]
• Picture and Picture, Picture in Picture :   4 : 3 → 16 : 9 →

• Others   :   Aspect switching is not possible.
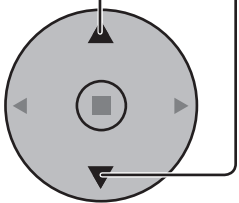

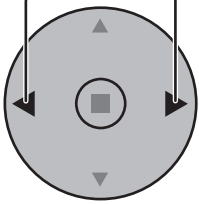

Notes:
• For PC signal input, the mode switches between "4:3", "Zoom" and "16:9" only.
• For a 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p signal input, the mode is set to "16:9" mode, and switching is not possible.
• Panasonic Auto can be selected only during Video signal input.
• The aspect mode is memorized separately for each input terminal.

| Mode	Picture	Explanation
4 : 3		4:3 will display a 4:3 picture at its standard 4:3 size.
Zoom		Zoom mode magnifies the central section of the picture.
16 : 9		16:9 will display the picture at its maximum size but with slight elongation.
Just		Just mode will display a 4:3 picture at its maximum size but with aspect correction applied to the center of the screen so that elongation is only apparent at the left and right edges of the screen. The size of the picture will depend on the original signal.
Panasonic Auto	For an elongated image Image is expanded For a 4:3 image Changes in accordance with the Panasonic Auto mode setting (see page 39).	The display will automatically become enlarged (depending on the picture source), allowing you to view the picture at its maximum size. **Notes:** • Panasonic Auto mode is designed to automatically adjust the aspect ratio to handle a mix of 16:9 and 4:3 program material. Certain 4:3 program material, such as stock market data screens, may occasionally cause the image size to change unexpectedly. When viewing such programs, it is recommended that the ASPECT be set to 4:3. • If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment. • Panasonic Auto can not be selected while BNC Dual Video Terminal Board (TY-FB9BD) is installed.

Note:
Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.
Adjusting Pos. / Size

1 POS. / SIZE ——— Press to display the Pos. /Size menu.

2 Press to select H-Pos / H-Size / V-Pos / V-Size / Clock Phase.

3 Press to adjust Pos. / Size.

4 R ——— Press to exit from adjust mode.
During "AV(S Video)", "Component" and "Digital" input signal.

| Pos. /Size	
Normalise Normal	
🖵 H-Pos	◀ 0 ▶
↔ H-Size	◀ 0 ▶
🖵 V-Pos	◀ 0 ▶
↕ V-Size	◀ 0 ▶

During "RGB / PC" input signal.

Pos. /Size	
Normalise Normal	
🖵 H-Pos	◀ 0 ▶
↔ H-Size	◀ 0 ▶
🖵 V-Pos	◀ 0 ▶
↕ V-Size	◀ 0 ▶
⋇ Clock Phase	◀ 0 ▶

Notes:
• Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/Digital signals are memorized for each frequency.)
• If a "Cue" or "Rew" signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the Picture Pos./Size function.
• If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

H-Pos Adjust the horizontal position.
H-Size Adjust the horizontal size.

V-Pos Adjust the vertical position.

V-Size Adjust the vertical size.

Clock Phase
(RGB/PC in mode) Eliminate the flickering and distortion.

Helpful Hint (N / Normalise Normalisation)

While the Pos. / Size display is active, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during "Normalise", then all adjustment values are returned to the factory settings.

Reduces screen image retention

These functions prevent the occurrence of an "image retention" on the display when turned ON.
  Wobbling: Automatically shifts the display image (therefore unnoticeable to the eye) to prevent image retention of sharper contour of image.
   On1: Shifts the image every 30 seconds.
   On2: Shifts the image at a dot level pitch depending on screen-detection.
  Peak limit: Suppresses image contrast (peak brightness).
     Note: When a still picture is viewed for an extended time, the screen may become slightly darker. (see page 51)

**1** SET UP

Press to display the Setup menu.

2 Press to select "Screensaver".

Press to display Screensaver menu.

Press to exit from Screensaver.
Notes:
• To reduce the occurrence of image retention, set the Side panel to High.
• The side panels may flash (alternate black / white) depending on the picture being shown on the screen. Using Cinema mode will reduce such flashing.

Reduces power consumption

- Power save: When this function is turned On, luminous level of the Plasma Display is suppressed, so power consumption is reduced.
- Standby save: When this function is turned On, power consumption of the microcomputer is reduced during power supply standby (see page 12, 14-15), so standby power of the set is reduced.
- Power management: The unit power supply is turned On or Off depending on whether or not there is a signal during PC input mode.
  This function is enabled when it is turned On. (Only during input from PC (Mini D-sub) terminal)
- Auto power off: Equipment power supply is turned Off when there is no signal.
  When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop.
  This function is effective for input signals except input from PC (Mini D-sub) terminal.

1 Press to select
"Power save"
"Standby save"
"Power management"
"Auto power off".

OSD Language	English (UK)
Note:
While selecting an Input signal through Optional Terminal Board connected to Slot1, Slot2 and Slot3, the Input label will depend on each Optional Terminal Board.

Input labels for Slot1, Slot2, Slot3 and Mini D-sub:
  [Slot1 Input] INPUT1 / VIDEO1 / COMPONENT1 / RGB1 / DIGITAL1 / PC1 / DVD1 / CATV1 / VCR1 / STB1
  [Slot2 Input] INPUT2 / VIDEO2 / COMPONENT2 / RGB2 / DIGITAL2 / PC2 / DVD2 / CATV2 / VCR2 / STB2
  [Slot3 Input] INPUT3 / VIDEO3 / COMPONENT3 / RGB3 / PC3 / DVD3 / CATV3 / VCR3 / STB3
  [PC (Mini D-sub) input] PC / COMPONENT / RGB / DVD / STB

When BNC Dual Video Terminal Board (TY-FB9BD) is used, an "A" or "B" is added at the end of each input label, depending on the input selected (see below).

Addition sign	"A"	"B"
Selected Input	Composite	S VIDEO

Setup for MULTI DISPLAY

(For TH-42PS10EK/S)

By lining up Plasma Displays in groups of 4, 9 or 16 as illustrated below, an enlarged picture may be displayed across all screens.
For this mode of operation, each plasma display has to be set up with a Display number to determine its location.

group of 4 (2 × 2 (F))   group of 9 (3 × 3 (F))   group of 16 (4 × 4 (F))

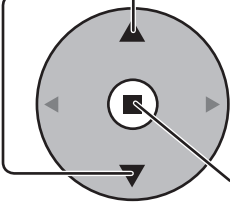

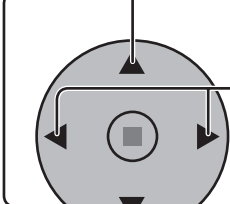

Two options are selectable for MULTI DISPLAY (see next page).

How to Setup MULTI DISPLAY

**1**   SET UP   Press to display the Setup menu.

2   Press to select the MULTI DISPLAY Setup.

Press to display the "MULTI DISPLAY Setup" menu.

ID Remote Control Function

You can set the remote control ID when you want to use this remote control on one of several different displays.

1 Switch ᴺᴼᴿᴹᴬᴸ ID to ᴺᴼᴿᴹᴬᴸ ID on the right side.

2 Press the C button on the remote control.

3 Press one of 1 - 9, 0 for the tens digit setting.

4 Press one of 1 - 9, 0 for the units digit setting.
Notes:
• The numbers in 2, 3 and 4 should be set up quickly.
• Adjustable ID number range is 0 - 99.
• If a number button is pressed more than two times, the first two numbers become the ID number for the remote control.

ID remote control button operation

The operation is the same as normal remote control except for the VOL button.

ID Cancellation

Press -/-- button on remote control. (This has the same effect as pressing the C, 0, 0 buttons at the same time.)

Notes:
• Set the Remote ID "On" to operate the ID remote control.
  If Remote ID is set to "On", you can use the remote control without identical ID number during option menu display. (see page 43, 46)
• The ID remote control cannot be used when ID select is set to anything other than 0, and the remote control ID is not the same as the ID select number (see page 43, 46).
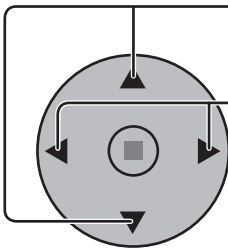

Setup for Input Signals

Component / RGB-in select

Select to match the signals from the source connected to the Component / RGB input terminals.
Y, P$_B$, P$_R$ signals ⇒ "Component"
R, G, B, HD, VD signals ⇒ "RGB"

1 SET UP

Press to display the Setup menu.

2 Press to select the "Component / RGB-in select".

Press to select the desired input signal.
Component ⟷ RGB

3 R

Press to exit from adjust mode.

Note:
Selection may not be possible, depending on which optional board is installed.

If the picture image becomes unstable:
With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

Mode	Function
Colour system	Set the colour system to match the input signal. When selecting "AUTO", the colour system is automatically selected from NTSC/PAL/SECAM, however, M.NTSC signal is not displayed properly depending on the attached terminal board. To display M.NTSC signal, select "M.NTSC" in Colour system. → Auto ←→ PAL ←→ SECAM ←→ M.NTSC ←→ NTSC ←
Panasonic Auto (4 : 3)	Set to "4 : 3" to view 4:3 images in an unchanged format when Panasonic Auto is selected. If you would like to view 4:3 images in Just format, set to "Just".

Note:
Panasonic Auto does not function when BNC Dual Video Terminal Board (TY-FB9BD) is used.

Cinema reality / P-NR

Cinema reality:
When on, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second.
If the picture is not stable, turn the setting to off.
Note:
When On, this setting only affects the following signal input:
• NTSC / PAL signal input during "AV(S Video)" input signal.
• 525i(480i) 625i(575i), 1125(1080) / 60i signal input during "Component" input signal.
P-NR:
Automatically reduces unwanted picture noise.
Note:
P-NR cannot be adjusted while a PC signal is being applied.

4 Press the Volume Up"+" or Down"–" button to select "YES".

5 Press the ENTER button and wait for 10 sec.

Note:
Press the R button to return to Setup menu when SHIPPING menu is displayed.

Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms		Checks
Picture	**Sound**	
Interference	Noisy Sound	Electrical Appliances Cars / Motorcycles Fluorescent light
Normal Picture	No Sound	Volume (Check whether the mute function has been activated on the remote control.)
No Picture	No Sound	Not plugged into AC outlet Not switched on Picture and Brightness/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)
No Picture	Normal Sound	If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.
No Colour	Normal Sound	Colour controls set at minimum level (see page 22, 23) Colour system (see page 39)
No remote control operations can be performed.		Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)
A cracking sound is sometimes heard from the unit.		If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.
The top or bottom of the picture on the screen is cut off when I use the zoom function.		Adjust the position of the picture on the screen.
Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function.		When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.
I can hear sounds coming from inside the unit.		When the power is turned on, a sound of the display panel being driven may be heard: This is normal and not indicative of malfunctioning.
This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.		

Plasma Display panel

Symptoms	Check
The screen darkens slightly when bright pictures with minimal movements are shown.	The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.
It takes a while for the picture to appear.	The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.
The edges of the images flicker.	Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.
The brightness on both sides of images in the 4:3 mode changes.	When viewing the side panels at the "High" or "Mid" setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.
Some parts of the screen do not light up.	The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.
Image retention appears	Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode. **Note:** The permanent image retention on the Plasma Display resulting from fixed image use is not an operating defect and as such is not covered by the Warranty. This product is not designed to display fixed images for extended periods of time.
[for TH-42PH10EK/S, TH-50PH10EK/S, TH-58PH10EK] Whirring sounds can be heard from the display unit.	The display unit is fitted with a cooling fan to dissipate heat generated during normal use. The whirring sound is caused by rotation of the fan and is not a malfunction.

VIDEO/PC input signals

VIDEO input (for TH-42PH10EK/S, TH-50PH10EK/S, TH-58PH10EK)

	Signal name	Horizontal frequency(kHz)	Vertical frequency(Hz)

∗ Picture Mute cannot be unlocked by powering off/on with the remote control. Turn off and on again with the button on the unit or enter the command VMT:0 to unlock Picture Mute.

Specifications

	TH-42PS10EK/S
Power Source	220 - 240 V AC, 50/60 Hz
Power Consumption	
Power on	280 W
Stand-by condition	Save off 0.8 W, Save on 0.6 W
Power off condition	0.2 W
Plasma Display panel	Drive method : AC type 42-inch, 16:9 aspect ratio
Screen size	920 mm (W) × 518 mm (H) × 1,056 mm (diagonal)
(No.of pixels)	408,960 (852 (W) × 480 (H)) [2,556 × 480 dots]
Operating condition	
Temperature	0 °C - 40 °C
Humidity	20 % - 80 %
Applicable signals	
Scanning format	525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 750 (720) / 60p · 50p, 1125 (1080) / 60i · 50i · 24p · 25p · 30p · 24sF ···· SMPTE274M, 1250 (1080) / 50i
PC signals	VGA SVGA, XGA, SXGA, UXGA ···· (compressed) Horizontal scanning frequency 15 - 110 kHz Vertical scanning frequency 48 - 120 Hz
Connection terminals	
PC IN	(HIGH-DENSITY MINI D-SUB 15PIN) Y or G with/sync 1.0 Vp-p (75 Ω) Y or G without/sync 0.7 Vp-p (75 Ω) B/P_B/C_B: 0.7 Vp-p (75 Ω) R/P_R/C_R: 0.7 Vp-p (75 Ω) HD/VD: 1.0 - 5.0 Vp-p (high impedance) VBS (use HD port) with/picture 1.0 Vp-p (high impedance) without/picture 0.3 Vp-p (high impedance) AUDIO IN (M3 JACK) 0.5 Vrms (high impedance)
SERIAL	EXTERNAL CONTROL TERMINAL (D-SUB 9PIN) RS-232C COMPATIBLE
SPEAKERS (6 Ω)	16 W [8 W + 8 W] (10 % THD)
Accessories Supplied	
Remote Control Transmitter	EUR7636090R
Batteries	2 × R6 Size
Fixing bands	TMME203 × 2
Dimensions (W × H × D)	1,020 mm × 610 mm × 89 mm
Mass (weight)	
main unit only	approx. 26.0 kg net
with speakers	approx. 30.0kg

Notes:
- Design and specifications are subject to change without notice. Mass and dimensions shown are approximate.
- This equipment complies with the EMC standards listed below.
  EN55022, EN55024, EN61000-3-2, EN61000-3-3.

Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union.
If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.
